Driver's Education

Behind-The-Wheel & Online Programs

Information and Registration Brochure

A comprehensive approach to responsible driving...

IN A VIRTUAL CLASSROOM

The online course "Virtual Drive" will provide instruction in:

- ★ Collision-reducing strategies
- ★ Rules and responsibilities for safe operation of motor vehicles
- ★ Preparation for students' learner's permit and behind-the-wheel exams

IN THE REAL WORLD

Behind-the-wheel instruction will supplement ongoing parental instruction by putting theory into practice. Totalling six hours, this instruction will familiarize students with proper techniques of handling a vehicle and sharing the road in urban, rural, and highway settings.

ONLINE, STUDENT-DIRECTED LEARNING

“Virtual Drive” is an online course component in the driver’s ed program.

“Virtual Drive” is a Pennsylvania state-approved, 30-hour, online course recognized by most insurance companies to qualify students for a reduction in auto insurance premiums for newly-licensed teen drivers in conjunction with behind-the-wheel instruction outlined on the next page (check with your insurance provider to see what benefits are available to you.)

Enrollment takes place during designated periods in the fall, winter, and spring, and is open to all CV students no sooner than three months before their 16th birthday. The online nature of the course allows students to set the pace of their own learning and parents/guardians are encouraged to join in the learning process.

Successful completion of the online course requires the student score of 75 percent or better on a final exam within one year of enrollment. Once the student has completed all 10 course modules, contact Christina Bender to schedule a final exam.

BEHIND-THE WHEEL INSTRUCTION

Conestoga Valley also offers six hours of behind-the-wheel instruction. Led by Pennsylvania certified driving instructors, this course teaches students:

- ★ Proper vision, braking, and steering patterns to reduce risks
- ★ Proper driver responses to traffic-control devices (such as red lights, stop signs, etc.)
- ★ Mechanics of parking
- ★ Proper techniques for interacting with other motorists
- ★ Proper techniques for passing slow-moving vehicles common to area roadways
- ★ Ways to minimize risks during inclement driving conditions
- ★ Mechanics of merging and exiting limited access highways
- ★ Stabilized driving in urban areas

Scheduling this series of lessons will take place during school hours and over the summer months. The successful completion of Virtual Drive and this behind-the-wheel phase will make students eligible to take an “on-the-road” driver’s license exam with a Conestoga Valley instructor.

This phase of driver’s education must be completed in conjunction with the online course to receive the certificate required for most insurance premium reductions and early eligibility for senior driver’s licenses.

Behind-the-wheel instruction will be scheduled no sooner than 90 days prior to a student’s test-eligible date.
